EXPERIENCE

Web Developer / Software Engineer

SEPTEMBER 2008 - PRESENT

Freelance, San Francisco, CA

- Developing custom web solutions for clients. Using React, Javascript, Typescript and frameworks such as Gatsby, Nextjs, Astro, Contentful and Sanity. Depending on client needs.
- Check my [portfolio](#) and my GitHub [profile](#), for projects, open source packages and tools that I have developed.

Senior Software Engineer

JUNE 2025 - DECEMBER 2025

F5, Remote (Contract)

- Migrated the [f5.com](#) website infrastructure from AEM to Sanity CMS and Nextjs. Improving the content editor experience and velocity in the process.
- Managed PRs, workflows, and code quality in Azure DevOps for the frontend.
- Built reusable React components to support rapid launches and consistent design across teams.

Web Developer / Software Engineer

JANUARY 2023 - JUNE 2024

ON, San Francisco, CA

- Transitioned marketing website infrastructure to Contentful CMS, improving content entry experience, and publishing speed by 80% for the marketing team.
- Implemented robust CI/CD publishing pipeline using GitHub Actions and webhooks.
- Developed and integrated features for ON's B2B portal for customizing conversational AI chatbot with React, TypeScript, and Web Components.
- Contributed to a no-code Canvas drag-and-drop solution for building chatbot workflows.

Web Developer / Software Engineer

FEBRUARY 2019 - OCTOBER 2022

Talend, San Mateo, CA

- Owned Talend's web properties from end-to-end, utilizing PHP and WordPress.
- Revamped Talend's marketing web properties infrastructure to Contentful CMS, React and Netlify.
- Extended website functionality by integrating 3rd party APIs and custom lead tracking functionality by developing plugins and tools. Both with PHP and later on using Javascript / React.

Web Developer

OCTOBER 2015 - OCTOBER 2017

CAKE, Redwood City, CA

- End-to-end ownership of all CAKE web properties, utilizing PHP/HTML/CSS and WordPress.
- Extended website functionality by integrating 3rd party APIs and custom lead tracking by developing plugins and tools.

Web Developer *Revel Systems, San Francisco, CA*

JULY 2013 - SEPTEMBER 2014

- Owned the development and management of the Revel Systems website independently, utilizing PHP.
- Created WordPress plugins to seamlessly integrate 3rd party APIs and lead tracking.
- Designed custom functionality to improve the content entry process in the WordPress back-end, increasing content update and publishing process for the marketing team.

Web Developer *PD Media Lab, Santa Rosa, CA*

AUGUST 2011 - FEBRUARY 2013

- Created WordPress websites for agency clients.
- Built plugins to integrate 3rd party APIs and other custom functionality.
- Managed end-to-end workflow from development to deployment.
- Converted high fidelity mockups to standard compliant PHP/HTML/CSS.

EDUCATION

Master of Arts (M.A.) - Informatics *Halmstad University, Halmstad*

SEPTEMBER 2004 - JUNE 2005

Continued studies in Information Science.

Bachelor of Arts (B.A.) - Informatics *Halmstad University, Halmstad*

AUGUST 2001 - JUNE 2004

Studied information science, Media and Communication and Pedagogy.
